📇 PERSONAL SUMMARY

I'm a full-stack web developer based in Tokyo Japan. I am looking for a position as a backend developer in an environment where I can push myself while learning new technologies. I aim to utilize both my technical and business experiences to have a positive impact in your business operations.

🧠 TECH SKILLS & TOOLS

HTML • Bootstrap • CSS / SCSS

JavaScript (ES6) • Ruby (Ruby on Rails)

Rails Mini-test • Python (Flask) • SQL

Git / Github • Heroku • Agile / Waterfall

Salesforce • SAP (Solman)

🎓 EDUCATION

Web Development
LeWagon
09/2021 – 03/2022 | Tokyo, Japan
While at LeWagon I completed a 24-week part-time intensive coding bootcamp.

Masters of International Business
Rikkyo University
09/2018 – 09/2020 | Tokyo, Japan
MBA style masters degree focused on International M&A in the Asia/Pacific region.

My primary skillset I gained form this program were- Business Development, Valuation and Forecasting Methods (DCF, EVA, Multiples), FDI Strategies.

🌐 LANGUAGES

English | **Japanese** (JLPT N1)

🎸 INTERESTS

International Communication

In addition to programming I have a passion for learning more about Japanese literature, culture and history. I hope to create a one stop application designed to help introduce Japanese literature, media and culture to those who may have difficulty accessing it currently due to language barriers and lack of current resources.

💼 PROFESSIONAL EXPERIENCE

IT Support (PMO)
Mitsubishi Fuso (Spotted Staffing)
08/2021 – present | Kanagawa, Japan
Member of the new vehicle IT team for Mitsubishi Fuso's FORCE DMS project.

- Primary point of contact between the various vendors used by FUSO from design to deployment.
- Managed the development, testing and deployment of 4 new applications added to the FORCE DMS system.
- Application Management across Fuso's vehicle and customer systems.
- Translation and interpretation.

Salesforce Administrator
Apex K.K.
10/2019 – 01/2020 | Ebisu, Japan
Salesforce administration (Intern) and worked on a project designed to integrate business activities into a new CRM

- Reviewed, formatted, and tagged over 10,000 candidate reports.
- Allowed for consultants to quickly find and access desired candidate profiles increasing the speed of the candidate placement process.
- Creation of a new tagging system that highlights candidate skills increasing access to candidate profiles across all divisions.
- Completed all assigned daily and weekly KPIs while maintaining a high level of detail.

🗂 DEVELOPMENT PROJECTS

Carearound
https://www.carearound.life

Carearound is a mobile app which helps you find a Japanese alternative to your favorite cosmetic products from back home here in Japan through community contributions!

Role: Backend Developer

Jedi Master Class
https://rails-jedi-master-class.herokuapp.com/

A website for a padawan (learner) to connect with a Master (teacher) and learn or teach some of your favorite skills found in the Starwars universe!

Role: Backend Developer
